Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4-9,11,13-15,18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pluta'344 et al.

The Pluta et al. reference discloses an automatic shutoff device for a filtered bottle water dispenser comprising a monitoring and disabling apparatus 30 and a charcoal filter media (32a,32b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pluta'344 et al. in view of Nohren'391, Jr.

The Pluta et al. reference discloses a filtered water dispenser (supra), but does not disclose the filter media as being carbon-loaded, non-woven and pleated. The Nohren, Jr. reference discloses another water dispenser with a filter media 35 being carbon-loaded, non-woven and pleated. It would have been obvious to one of ordinary skill in the art at the time the

Art Unit: 3751

invention was made to substitute the pleated filter media of Nohren et al. for the filter media of Pluta et al. wherein so doing would merely amount to the substitution of one type filter media for another which would work equally well in the Pluta et al. device.

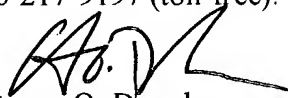

Conclusion

Claims 3,10,16,17,and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
